## INVITATION

The Advanced Signal Processing Research Group, Faculty of Electrical Engineering, UiTM is pleased to announce *The Workshop on System Identification for Sensing and Process* which will be held in the Faculty of Electrical Engineering, Universiti Teknologi MARA, Shah Alam, Malaysia on 21-22 November 2007. The workshop is to be conducted by Prof. Dr. Mohd Nasir Taib (<http://www.asprg.org/member/profnasir>). The workshop is tailored to provide an excellent platform for beginners to explore an exciting route of system identification research. The focus of this workshop is on sensing and process, which include black box modeling, nonlinear system identification and process identification. The workshop materials will be delivered by lectures as well as hands-on. The computing program such as MATLAB will be used throughout the hands-on sessions.

### WHO WILL BENEFIT?

This workshop is aimed at prospective and current postgraduate students, engineers, scientists, researchers and educators who are interested in system identification. Related areas include signal processing, instrumentation, control and neural network.
